538's criterion:
The poll must include the name of the pollster es and details about the population sampled. If
these are not included in the poll's release, we must be able to obtain them in order to include the
poll.
Pollsters must also be able to answer basic questions about their methodology, including but not
limited to the medium through which their polling was conducted (e.g., landline calls, text, etc.),
the source of their voter files and their weighting criteria.
